

100th Day Service Project

100 Pine Cone Bird Feeders

The 100th Day of School is a time to celebrate in the Lower School. Each year students mark this milestone with a class service project. This year First Grade made 100 pinecone and peanut butter bird feeders and distributed them around campus. First Grade learned that one important way to support our local bird population is to provide food during the colder winter months. The students enjoy checking on the feeders during our bird watching walks and are ready to make more for Spring!
